

Brio Living Services follows current regulatory guidance for both Covid exposure and Covid positive cases. These protocols vary, based on the type of community and regulatory agencies that provide oversight.

Below are the current guidelines being followed.

### **SKILLED NURSING COMMUNITIES** *(Porter Hills Health Center, Kresge Rehab, Green House Home)*

#### Covid Positive Residents

- Isolate for 10 days

#### Resident Close-Contact\* Exposure to Covid

- If Close Contact Exposure and Asymptomatic:
  - Do not need to place in Isolation
  - Must wear a mask for 10 days around others
    - Staff caring for resident must mask around them, as well
    - If unable to mask, consider putting in Transmission Based Precautions (TBP)
      - May remove from TBP after day 7 if all testing has been negative
- Test per Exposure Testing Guidelines
- If Close Contact Exposure and Symptomatic:
  - Place in TBP
  - Perform exposure testing per guidelines
  - May remove after 7d if all testing has been negative

*\*Close-Contact= Within 6ft of positive person for more than 15 minutes*

### **INDEPENDENT LIVING AND ASSISTED LIVING COMMUNITIES**

#### Covid Positive Residents

- Isolate until 24 hours after fever is gone or symptoms improved
  - So, if no fever or symptoms then only 24 hours of isolation is needed
- Wear a mask for 5 days after coming out of isolation

#### Resident Close-Contact Exposure to Covid

- Do not need to isolate
- Get tested at least 5 days after exposure
- Wear a mask for 10 days
  - Watch for Covid symptoms during this 10 days and test if any develop
